

FerozEnergy Sample Savings Report

This sample report illustrates how rate and tariff analysis can uncover savings across multiple sites and utilities. We reviewed historical usage and tariff structures for five representative accounts served by two utilities (PSE&G and PECO). For each account we compare the current tariff to a recommended alternative and estimate potential annual savings.

Account ID	Utility	Current Tariff	Recommended Tariff	Estimated Annual Savings (\$)
Site A1	PSE & G	GS-3	LC-T	1,200
Site A2	PSE & G	GS-3	LC-T	950
Site B1	PECO	Rate GS Small	Rate GS Medium	800
Site C1	PECO	Rate HT	Rate PD	1,450
Site D1	PS	RSB	GLPT	680
